Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1626

Claims 1-30 are pending in this application.

Claims 10-30 are drawn to non-elected invention.

Restriction Requirement

The election of group I, claims 1-9, without traversal in Paper filed 6/9/05 is hereby acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification lacks adequate description for the claims. There is no evidence in the specification that any known "chelating ligand" or "Schiff base-containing ligand" is applicable in the instant invention. Applicant must claim only "chelating ligand" or "Schiff base-containing ligand" that embodies applicant's invention, and have support in the specification. By adding specific "chelating ligand" and "Schiff base-containing ligand" having support in the specification to claims 1-2 respectively, the rejection would be overcome.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Art Unit: 1626

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. For reasons set forth above under 35 USC 112, first paragraph claims 1-9 are indefinite. Also, it is not possible to determine the metes and bounds of the claims.

The general formula in claims 1-2 is not a normal chemical nomenclature, it is not possible to perform a complete search of the formula, and therefore claims 1-9 are indefinite. By adding a searchable generic formula of the instant invention the rejection would be overcome.

The term "comprising", line 1 of claims 1-2, renders claims 1-9 indefinite. The term is an open-ended term and cannot be used in referring to a compound. By replacing the term with "having" the rejection would be overcome.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-9 are rejected under 35 U.S.C. 102(a) as being anticipated by Keizer et al., Canadian J. Chem, (2002), Vol. 80, No. 11, page 1463-68.

Keizer et al., disclose the instant compounds in pages 1463-1465. Keizer et al., disclose salen ligand, a Schiff base-containing ligand. For example, see the specification, page 5, lines 11-12.
